WHO ARE WE

MAAM Petroleum & Enterprises Co. Ltd has been formed to work progressively in the field of import & export business. We offer a secure platform to facilitate the supply of quality products across domestic and foreign countries. As an import & export business, we seek to provide real services to exporters and importers who are committed to the worldwide supply of commodities around the entire world.

We deal reasonably with producers, farmers, wholesalers, importers, and other stakeholders to establish a strong global presence in international trade right away. Being an import export company, our final aspiration is to close the gap in the foreign market between buyers and sellers. In order to offer the highest quality of merchandise, ensure customer satisfaction and cultivate customer loyalty, we guarantee assistance by qualified consultants.

FUEL & LUBRICANTS

We provide premium quality fuel around Juba and other cities of South Sudan to meet consumer demand, ensuring quality assurance certifications are met, with a highly specialized logistics department that can execute any volume requested.

PRODUCT RANGE
Diesel
Petrol
Gasoline
Heavy duty fuels
Oil and lubricants
Jet fuel

FUEL SUPPLIES

We are committed to providing you with the highest quality of fuel supplies and lubricants. Our team will work with you to find a solution that fits your needs. We deliver fuel and supplies to your home or office. We also follow up with you after your purchase to make sure everything is working for you.

OPERATIONAL CAPACITY

The Company has developed a regional operational capacity covering:

AREA OF OPERATION
Petroleum product sourcing and procurement
Bulk fuel supply
Retail fuel distribution
Commercial and industrial fuel supply
Cross-border transportation
Fuel storage and depot operations
Fleet management
Fuel station operations
Project-based fuel supply
Fuel delivery to remote locations
Lubricants and associated petroleum products
Emergency and contingency fuel supply

INDICATIVE CAPACITY

AREA	COMPANY CAPACITY
Annual petroleum supply capacity	**[XX] million litres**
Monthly supply capacity	**[XX] million litres**
Daily distribution capacity	**[XX] litres**
Storage capacity	**[XX] million litres**
Fuel stations	**[XX] stations**
Petroleum tankers	**[XX] trucks**
Operational depots	**[XX] depots**
Regional markets	Kenya, Uganda, DRC, Sudan & South Sudan
Main supply base	Kenya

The Company's capacity can be scaled according to customer requirements, contract volumes and project requirements.

FUEL STATIONS

The Company operates and/or has access to a network of petroleum service stations strategically located in key commercial and transport corridors.

STATION NETWORK

ITEM	DETAIL
Total number of stations	**[XX]**
The station network supports	• Retail fuel sales • Diesel and petrol distribution • Commercial fleet refueling • Lubricant sales • Customer account fueling • Corporate fleet services • Bulk fuel supply • Emergency fuel requirements
Strategic location	The station network is positioned to support major transportation and commercial corridors connecting Kenya, Uganda, South Sudan and DRC, as well as Kenya and Sudan/South Sudan supply corridors, subject to applicable border, customs and regulatory requirements.

PETROLEUM DEPOTS AND STORAGE FACILITIES

The Company maintains access to strategically located petroleum storage and distribution facilities, enabling it to receive, store and dispatch petroleum products according to customer requirements.

DEPOT NETWORK

LOCATION	FACILITY	STORAGE
Kenya	Main depot	**[XX] litres**
Kenya	Secondary depot	**[XX] litres**

DEPOT INFRASTRUCTURE PROVIDES
Bulk petroleum storage
Product receiving
Loading and offloading
Tanker dispatch
Stock management
Product reconciliation
Quality control
Regional distribution
Emergency stockholding

Where required, the Company can use third-party licensed petroleum storage facilities to increase available capacity and support large-volume contracts.

REGIONAL SUPPLY & LOGISTICS NETWORK

One of the Company's key competitive advantages is its regional petroleum supply and logistics network, with its principal supply base in Kenya.

REGIONAL SUPPLY STRUCTURE

COUNTRY	ROLE AND ACTIVITIES
Kenya Main supply base	Kenya serves as the Company's principal procurement and logistics hub. Petroleum products can be sourced from licensed petroleum marketers and from refineries/import terminals, then transported through established regional corridors.
Uganda	The Company supplies petroleum products into Uganda through established road transportation and distribution networks. • Bulk fuel transportation • Commercial fuel supply
South Sudan	South Sudan represents a strategic market for the Company. • Oil and gas companies • Mining companies

SUPPLY CHAIN MODEL

The Company's regional petroleum supply chain operates broadly as follows:

STEP	STAGE
1	International/regional petroleum source
2	Kenya import terminal / petroleum depot
3	Bulk storage
4	Quality control & product verification
5	Petroleum tanker loading
6	GPS-tracked regional transportation to Kenya / Uganda / DRC / South Sudan / Sudan
7	Customer depot / fuel station / project site
8	Final delivery & reconciliation

This model allows the Company to provide customers with end-to-end petroleum supply solutions rather than simply acting as a fuel reseller.

CLIENTS IN SOUTH SUDAN

The Company has the capacity to serve a broad range of institutional and commercial customers in South Sudan.

TARGET / EXISTING CLIENT CATEGORIES

SECTOR	CLIENTS
Government institutions	• Ministries and government agencies • State-owned enterprises • Security and public institutions • Government projects • Public infrastructure projects
Oil & gas sector	• Oil exploration companies • Production companies • Oilfield service companies • Drilling contractors • Oilfield logistics companies • Pipeline operators
